Since our products are thermal film, their quality can be affected depending on storage condition. In particular, exposure to high heat or humidity can degrade image quality drastically.

Our products should be stored indoors in their original full packaging, at temperatures between 5°C and 30°C, with a relative humidity of 40% to 50%. Long term storage at temperatures over 30°C or over 50% relative humidity can lead to a reduction in image quality.

Handling Condition

- Keep paper in a dark, cool, and dry place to prevent fade-out.
- Do not apply volatile organic solvent, such as alcohol, on the surface.
- Do not apply plastic tapes, plastic erasers, vinyl, plasticizer, and fingerprint.
- Do not rub the printed surface.
- Store each printed sheet face up, or stack with a piece of paper between each sheet.
